

CMORGANELLI DESIGNS

RESPONSIVE CREATIVE

Web Designer... aka Creative Genius

CMorganelli Designs is excited to announce that we are seeking a super-creative, energetic Web Designer. Are you a creative thinker? Do you collaborate well with others? Do you spend hours on end looking through websites studying the latest design trends? Does the constantly evolving nature of web design excite you more than it scares you? If you answered "yes" to even 3 of these 4 questions, you just might have a home at one of the coolest agencies around the Lehigh Valley!

You'll be working closely with our wicked awesome team and clients to ensure designs are consistent with CMorganelli Designs' exceptionally high standards for elegant aesthetics and usability. Ideally you have a strong understanding of user-centric design. The ability to interpret our client's design goals and effectively present designs back to them is essential.

Responsibilities

- Create killer designs!
- Work closely with clients to understand and translate requirements
- Work to design beautiful, engaging visual solutions
- Communicate ideas and concepts clearly and concisely, while also being open to receiving feedback and direction as needed
- Again, create killer designs!
- Maintain current, relevant knowledge of user design trends, standards and techniques
- Manage time effectively and work on multiple project timelines simultaneously in a demanding deadline-driven environment. No really. We need to get it done for our clients!
- Act as a resource and thought partner to colleagues. Become an asset!

Qualifications

- Strong talent for visual design, layout, and typography with excellent attention to detail
- Affinity for current industry developments, design trends, and technologies
- A knowledge of UX processes and methodologies a plus
- Ability to react well to design direction from team and clients
- Proficient to expert in Adobe's Creative Suite
- Experience with mobile design.
- HTML(5), CSS and the related. Yes, there's more! (PHP, JavaScript, JQuery... and so on!)
- CMS systems such as Wordpress, Joomla or similar a plus
- Online Portfolio of work preferred

We will need to evaluate your ability to create designs, not just modify pre-existing themes and templates. To apply, send a cover letter, resume with salary requirements, and link to your online portfolio by email to Contact@CMorganelliDesigns.com. No phone calls, please.
